INJURY AND ILLNESS PREVENTION PROGRAM (“IIPP”) COVID-19 ADDENDUM

California employers are required to establish and implement an Injury and Illness Prevention Program (IIPP) to protect employees from all worksite hazards, including infectious diseases.

Charter School has adopted this addendum to accommodate reopening school for in-person instruction in accordance with the COVID-19 and Reopening In-Person Instruction Framework & Public Health Guidance for K-12 Schools in California, 2020-2021 School Year Framework for Reopening K-12 Schools from the California Department of Public Health (CDPH). This document additionally complies with the temporary Cal/OSHA regulations issued November 30, 2020 which require a “written COVID-19 prevention plan.” Resumption of in-person instruction presumes that the Charter School has complied with all applicable requirements pursuant to California’s Blueprint for a Safer Economy Program, as well as the “Safe Schools for All Plan.” Charter School and worksite administrators should coordinate with state and local health officials to obtain timely and accurate information about the level of disease transmission in the local community before resuming any on-site work practices. Local conditions will influence the decisions that public health officials make regarding community-level strategies. Resumption of in-person instruction presumes that the Charter School has complied with all applicable requirements pursuant to California’s Blueprint for a Safer Economy Program, as well as the “Safe Schools for All Plan.” Charter School and worksite administrators should coordinate with state and local health officials to obtain timely and accurate information about the level of disease transmission in the local community before resuming any on-site work practices. Local conditions will influence the decisions that public health officials make regarding community-level strategies.

This addendum contains three parts. Part one contains background information regarding COVID-19, including known symptoms, emergency warning signs and high-risk factors. Part two provides guidelines for implementation of a COVID-19 Infection Control Plan, which includes short-term measures to implement while COVID-19 remains endemic in states and communities. Part three contains measures to maintain a healthy workforce until herd immunity in the population is achieved or the global incidence of COVID-19 comes under control.

Background

In November 2019, a novel coronavirus (SARS-CoV-2) was discovered in Wuhan, China, which was found to cause a viral respiratory illness (coronavirus disease 2019, or “COVID-19”) leading to severe injury and death in certain populations, particularly elderly persons and persons with underlying health conditions.
COVID-19 was declared a pandemic by the World Health Organization on March 11, 2020. In response to the COVID-19 Pandemic, public health officers in many states and counties ordered all individuals to stay home or at their place of residence (i.e., “Shelter in Place”), except as needed to maintain continuity of operations of certain critical infrastructure sectors. Across the nation, public schools and most other government offices and private businesses were closed in order to slow the spread of the coronavirus in the community. Many states and localities have now commenced phased reopening.

In 2020, the CDC identified the following symptoms of COVID-19, which typically appear within 2-14 days after exposure to the virus:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

The CDC also recommends that, if a person shows any of the following emergency warning signs, * he or she should seek emergency medical care immediately:

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion
- Inability to wake or stay awake
- Bluish lips or face

*Please note that this is not a complete list of all possible symptoms. Anyone experiencing any other symptoms that are severe or concerning should contact a medical provider.

Certain people are at higher risk for severe illness from COVID-19, including:

- People 65 years and older
- People who live in a nursing home or long-term care facility
- People of all ages with underlying medical conditions, particularly if not well controlled,
including:
- People with chronic lung disease or moderate to severe asthma
- People who have serious heart conditions
- People who are immunocompromised
  - Many conditions can cause a person to be immunocompromised, including cancer treatment, smoking, bone marrow or organ transplantation, immune deficiencies, poorly controlled HIV or AIDS, and prolonged use of corticosteroids and other immune weakening medications
- People with severe obesity (body mass index [BMI] of 40 or higher)
- People with diabetes
- People with chronic kidney disease undergoing dialysis
- People with liver disease

Decisions to resume operations should be based on both the level of disease transmission in the community and the capacity to protect the safety and health of staff and students at each school site. By providing guidelines for the design of a control plan for COVID-19, part two of this addendum is intended to allow for the resumption of school by implementing measures to prevent and slow the spread of COVID-19 within the workplace.

**COVID-19 Infection Control Plan**

Before resuming normal or phased school activities after a Shelter in Place order is lifted, prepare and implement a COVID-19 preparedness, response, control and prevention plan (i.e., COVID-19 Infection Control Plan). Federal, state, and local public health communications must be monitored to keep up with information available about COVID-19 regulations, guidance, and recommendations, to ensure that workers have access to the timeliest information.

1. **Design, implement, update and maintain a COVID-19 Infection Control Plan:**

   The overall goal of the COVID-19 Infection Control Plan is to decrease the spread of COVID-19 and lower the impact of the disease in the workplace. This includes the following objectives:

   - Prevent and reduce transmission among employees;
   - Maintain healthy school operations; and
   - Maintain a healthy work environment.

   All site administrators should implement and update as necessary a control plan that:

   - Is specific to your workplace;
   - Identifies all areas and job tasks with potential exposures to COVID-19; and
   - Includes control measures in this policy to eliminate or reduce such exposures.
COVID-19 Infection Control Plans should consider that employees may be able to spread COVID-19 even if they do not show symptoms, which is a source of anxiety in the workforce, particularly among higher-risk individuals. Therefore, it is important to have discussions with workers about planned changes and seek their input. Additionally, collaboration with workers to effectively communicate important COVID-19 information.

2. Adjust operations to slow the spread:

- Employees who have COVID-19 symptoms should notify their supervisor and stay home as directed.
- Sick employees should follow CDC-recommended steps for self-quarantine. Employees should not return to work until the criteria to discontinue home isolation are met, in consultation with their supervisor, local health departments and healthcare providers.
- Employees who appear to have symptoms upon arrival at work or who become sick during the day should immediately be separated from other employees, students, and visitors, and sent home.
- Adopt a procedure for the safe transport of an employee who becomes sick while at work. The employee may need to be transported home or to a healthcare provider.
- Employees who are well but who have a sick family member at home with COVID-19 should notify their supervisor and follow CDC-recommended precautions.
- If implementing in-person health checks, conduct them safely and respectfully. Protect the screener using social distancing, barrier or partition controls, or personal protective equipment ("PPE"). However, reliance on PPE alone is a less effective control and is more difficult to implement, given PPE shortages and training requirements.
- Complete the health checks in a way that helps maintain social distancing guidelines, such as providing multiple screening entries into the building.
- Follow guidance from the Equal Employment Opportunity Commission regarding confidentiality of medical records from health checks.
- To prevent stigma and discrimination in the workplace, make employee health screenings as private as possible. Do not make determinations of risk based on race or country of origin or any other protected characteristics, and be sure to maintain confidentiality of each individual’s medical status and history.

3. Conduct a Workplace Hazard Assessment:

The purpose of a hazard assessment of the workplace is to identify where and how workers might be exposed to COVID-19 at work. Combinations of controls from the hierarchy of controls are used to limit the spread of COVID-19 (see Controls Table in Appendix A). These include engineering controls, workplace administrative policies, and personal protective equipment (PPE) to protect workers from the identified hazards.
Conduct a thorough hazard assessment to determine if workplace hazards are present, or are likely to be present, and determine what type of controls are needed for specific job duties, including:

- Evaluating potential workplace exposures which employees or other persons at the Charter School campus may encounter.
- Evaluating places where Charter School employees or others may congregate on campus, such as hallways, bathrooms, and break rooms.
- Reviewing and incorporating all applicable federal, state, and local public health guidance related to COVID-19, as well as any other industry-specific guidance.
- From time to time, evaluate existing COVID-19 health and safety measures to determine whether additional or different measures are necessary.
- Periodically conduct inspections to identify any potential COVID-19 unhealthy conditions, work practices, procedures, and to ensure compliance with all COVID-19 health and safety measures.
- Encouraging employees and their exclusive representative, if any, to participate and assist the Charter School in identifying and evaluating potential COVID-19 workplace hazards. The School will do so by:
  - Before implementing this plan, the School will consult with employees’ exclusive representatives and coordinate a virtual safety meeting in February 2021. At the safety meeting, the School will discuss the components of the COVID-19 Prevention Plan with employees and exclusive representatives. The School will additionally seek input from employees and exclusive representatives regarding potential COVID-19 hazards. In advance of the virtual safety meeting, employees and exclusive representatives are encouraged to consider areas on campus which they believe pose a high-risk of COVID-19 transmission, as well as activities on campus that are difficult to complete while complying with all health and safety guidance.
  - In consultation with employees’ exclusive representatives, the School will create a rotating team of employees to participate in hazard assessments on campus. These assessments will occur virtually to the greatest extent practicable. These assessments will occur weekly. All employees are encouraged to volunteer for participation in hazard assessments, and the School will rotate teams of employees, ensuring all groups of School personnel are equally represented to the greatest extent possible.
  - If employees and/or exclusive representatives have specific COVID-19 hazard concerns, they may contact the school site principals (Chief Compliance Officer) to discuss such concerns, who may be reached at:
If a hazard assessment reveals any potential COVID-19 hazards, the Charter School will immediately act to correct the hazard. The school site principal (Chief Compliance Officer) will be responsible for responding to and correcting any potential COVID-19 hazards.

When engineering and administrative controls cannot be implemented or are not fully protective:

- Determine what PPE is needed for each workers’ specific job duties,
- Select and provide appropriate PPE to the workers at no cost, and
- Train their workers on its correct use.

Until lifted, the Governor has ordered that all workers must wear a cloth face covering at work if the hazard assessment has determined that they do not require PPE (such as a respirator or medical facemask) for protection.

- A cloth face covering contains the wearer’s respiratory droplets to help protect their co-workers and others.
- Cloth face coverings are not considered PPE. They help prevent those who do not know they have the virus from spreading it to others, but do not offer the same level of protection for wearers from exposure to the virus that causes COVID-19 as PPE.
- Remind employees that CDC recommends wearing cloth face coverings in public settings.
where other social distancing measures are difficult to maintain, especially in areas of significant community-based transmission. Wearing a cloth face covering, however, does not replace the need to practice social distancing.

4. Take action if an employee is suspected or confirmed to have COVID-19 infection:

Current Cal/OSHA Regulations

- Effective immediately, upon one (1) “COVID-19 case”¹ in the workplace, the Charter School will:
  - Investigate the COVID-19 case, determine the day and time the COVID-19 case was last present on the Charter School campus, the date of the positive test and/or diagnosis, and the date the case has one (1) or more COVID-19 symptoms, if any.
  - Investigate whether other Charter School employees or any other third parties may have had a COVID-19 exposure by evaluating the activities of the COVID-19 case at the Charter School campus during the “high-risk exposure period”².
  - Give notice of potential exposure, within one (1) business day, and without revealing any personal identifying information³ of the COVID-19 case, to:
    - 1) All employees and their authorized representatives, if any, who may have had COVID-19 exposure, and
    - 2) Independent contractors and other employers present at the workplace during the high-risk exposure period.
  - Offer testing for COVID-19 to all employees with potential COVID-19 exposure in the workplace, at no charge and during working hours, as well as:
    - Information regarding COVID-19-related benefits under all applicable federal, state, and local laws, as well as potential salary continuation rights during any period of exclusion due to the COVID-19 exposure.
  - Investigate the potential that workplace conditions contributed to the risk of COVID-19 exposure, as well as remedial steps that could have been taken to reduce the risk of COVID-19 exposure.

- Effective immediately, and pursuant to current Cal/OSHA regulations:
  - All employees with COVID-19 exposure shall be excluded from the Charter School campus for fourteen (14) days from the last known exposure to a COVID-19 case.
  - Charter School employees with confirmed COVID-19 must not return to the Charter School campus as follows⁴:

¹ Cal/OSHA regulations define a “COVID-19 case” as a person who: 1) Has a positive COVID-19 test, 2) is subject to a COVID-19 related order to isolate issued by a local health department or state health official, or 3) has died due to COVID-19, in the determination of a local health department or per inclusion in the COVID-19 statistics of a county.

² “High-risk exposure period” is defined by Cal/OSHA as: 1) For individuals with COVID-19 symptoms, from two (2) days before the symptoms first develop until ten (10) days after symptoms first appeared, and 24 hours have passed with no fever, without the use of fever-reducing medications, and symptoms have improved; or 2) for asymptomatic individuals who test positive for COVID-19, from two (2) days before until ten (10) days after the first positive COVID-19 test specimen was collected.

³ All personally identifying information related to COVID-19 cases or those with COVID-19 symptoms shall be kept confidential. However certain information may be provided to public health authorities, as required by law.

⁴ The Charter School will not require a negative test prior to an employee returning to work. 8 CCR 3505(c)(11)(D).
• For Employees who test positive and have symptoms consistent with COVID-19:
  • 1) At least twenty-four (24) hours have passed since a fever of 100.4 or higher has resolved without the use of fever-reducing medications,
  • 2) COVID-19 symptoms have improved, and
  • 3) At least ten (10) days have passed since COVID-19 symptoms first appeared.
• Employees who test positive but remain asymptomatic shall not return to the Charter School campus until at least ten (10) days have passed since the date of specimen collection of their first positive COVID-19 test.
  o Employees excluded from work due to COVID-19 exposure may be entitled to salary continuation during the fourteen (14) day exclusion period. The Charter School may elect to provide paid sick leave during this period. Any salary continuation benefits will account for funds received from public sources during this period, as well as any indemnity benefits as part of any workers’ compensation claim related to the employee’s COVID-19 exposure.
• If a COVID-19 case is not work-related pursuant to all applicable workers’ compensation laws, Charter School employees are not entitled to salary continuation during the fourteen (14) day exclusion period.
• If a Charter School employee is unable to work for reasons other than protecting other employees or students at the Charter School campus from possible COVID-19 transmission, the employee is not entitled to salary continuation during the fourteen (14) day exclusion period.

• Effective immediately, and in the event of a confirmed COVID-19 case at the Charter School campus, the Charter School will notify the local public health department, as required by law.

• Effective immediately, upon notice any COVID-19-related serious illnesses or death\(^5\) of an employee occurring in a place of employment or in connection with any employment, the Charter School will immediately report such information to Cal/OSHA.

AB 685
Effective January 1, 2021, employers are required to provide certain notices in response to a “notice of potential exposure to COVID-19,” in accordance with Labor Code section 6409.6. A “notice of potential exposure” means any of the following:

(a) Notification from a public health official or licensed medical provider that an employee was exposed to a qualifying individual at the worksite;
(b) Notification from an employee, or their emergency contact, that the employee is a qualifying individual;
(c) Notification through the school’s testing protocol that the employee is a qualifying individual; or
(d) Notification from a subcontracted employer that a qualifying individual was on the

\(^5\) Pursuant to 8 CCR §330(h), “Serious injury or illness means any injury or illness occurring in a place of employment or in connection with any employment that requires inpatient hospitalization for other than medical observation or diagnostic testing, or in which an employee suffers an amputation, the loss of an eye, or any serious degree of permanent disfigurement.”

Updated on 01/28/2021
schoolsite.

Upon receipt of a “notice of potential exposure,” the Charter School must take the following actions within one (1) business day of the notice:

(a) Provide a written notice to all employees who were on the premises in the same worksite as the qualifying individual within the infectious period that they may have been exposed to COVID-19.

(b) Provide a written notice to the exclusive representative, if any, of the above employees.

(c) Provide all employees who may have been exposed and the exclusive representative, if any, with information regarding COVID-19-related benefits to which employees may be entitled under applicable federal, state, or local laws.

Information regarding COVID-19-related benefits includes, but is not limited to, workers’ compensation, and options for exposed employees, including COVID-19-related leave, Charter School sick leave, state-mandated leave, supplemental sick leave, or negotiated leave provisions, as well as antiretaliation and antidiscrimination protections applicable to employees.

(d) Notify all employees, and the employers of subcontracted employees and the exclusive representative, if any, on the disinfection and safety plan that the employer plans to implement and complete per the guidelines of the federal Centers for Disease Control.

Records of the above notices must be retained for a minimum of three (3) years.

Effective January 1, 2021 the school must also take the following responses in the event of a COVID-19 “outbreak,” as defined by CDPH:

• Within forty-eight (48) hours, the Chief Executive Officer or designee shall notify the county public health department of the names, number, occupation, and worksite of employees who meet the definition of a qualifying individual.

---

6 The “worksite” does not include buildings, or floors within multistory buildings, that a qualifying individual did not enter. If the Charter School operates multiple worksites, the school must only notify employees who worked at the same worksite as the qualified individual. (Labor Code § 6409.6, subd. (d)(5).)

7 A “qualifying individual” means (a) a laboratory-confirmed case of COVID-19, as defined by the State Department of Public Health; (b) a positive COVID-19 diagnosis from a licensed health care provider; (c) a COVID-19-related order to isolate provided by a public health official; (d) died due to COVID-19, in the determination of a county public health department or per inclusion in the COVID-19 statistics of a county. (Labor Code § 6409.6, subd. (d)(4).)

8 The “infectious period” means the time a COVID-19-positive individual is infectious, as defined by the State Department of Public Health. (Labor Code § 6409.6, subd. (d)(2).)

9 Written notice must be provided in the same manner that the Charter School ordinarily uses to communicate employment-related information. Written notice may include, but is not limited to, personal service, email, or text message if it can reasonably be anticipated to be received by the employee within one business day of sending and shall be in both English and the language understood by the majority of the employees.

10 Written notice to the exclusive representative must contain the same information as required in an incident report in a Cal/OSHA Form 300 injury and illness log unless the information is inapplicable or unknown to the school. This requirement does not apply if the school’s employees do not have an exclusive representative.

11 A “qualifying individual” means (a) a laboratory-confirmed case of COVID-19, as defined by the State Department of Public Health; (b) a positive COVID-19 diagnosis from a licensed health care provider; (c) a COVID-19-related order to isolate provided by a public health official; (d) died due to COVID-19, in the determination of a county public health department or per inclusion in the COVID-19 statistics of a county. (Labor Code § 6409.6, subd. (d)(4).)
• The Chief Executive Officer of designee shall also report the address and NAICS code of the worksite where the qualifying individuals work.
• Additional notice will be provided of any subsequent laboratory-confirmed cases of COVID-19 at the worksite.
Other Relevant Public Health Guidance

Specific guidelines for responding to suspected and confirmed cases of COVID-19 in schools are also found in the COVID-19 and Reopening In-Person Instruction Framework & Public Health Guidance for K-12 Schools in California, 2020-2021 School Year, issued January 14, 2021. In most cases, you do not need to shut down the facility. If it has been less than seven (7) days since the sick employee has been in the facility, close off any areas used for prolonged periods of time by the sick person:

- Wait twenty-four (24) hours before cleaning and disinfecting to minimize potential for other employees being exposed to respiratory droplets. If waiting twenty-four (24) hours is not feasible, wait as long as possible.
- During this waiting period, open outside doors and windows to increase air circulation in these areas.

If it has been seven (7) days or more since the sick employee used the facility, additional cleaning and disinfection is not necessary. Continue routinely cleaning and disinfecting all high-touch surfaces in the facility.

Follow the CDPH and CDC cleaning and disinfection recommendations:

- Clean dirty surfaces with soap and water before disinfecting them.
- To disinfect surfaces, use products that meet EPA criteria for use against SARS-Cov-2, the virus that causes COVID-19, and are appropriate for the surface.
- Always wear gloves and other PPE appropriate for the chemicals being used when you are cleaning and disinfecting.
- You may need to wear additional PPE depending on the setting and disinfectant product you are using. For each product you use, consult and follow the manufacturer’s instructions for use.

Determine which employees may have been exposed to the virus and may need to take additional precautions:

- Inform employees of their possible exposure to COVID-19 in the workplace but maintain confidentiality as required by the Americans with Disabilities Act (ADA).
- Follow the public health recommendations for community-related exposure and instruct potentially exposed employees to stay home for fourteen (14) days, or such period as established by local health order, telework if possible, and self-monitor for symptoms.
- Specific guidelines for responding to suspected and confirmed cases of COVID-19 in schools are found in the Framework for Reopening K-12 Schools released by the CDPH on July 17, 2020. In most cases, you do not need to shut down the facility. If it has been less than 7 days since the sick employee has been in the facility, close off any areas used for prolonged periods of time by the sick person:

Wait 24 hours before cleaning and disinfecting to minimize potential for other employees being exposed to respiratory droplets. If waiting 24 hours is not feasible, wait as long as possible.
During this waiting period, open outside doors and windows to increase air circulation in these areas.

If it has been 7 days or more since the sick employee used the facility, additional cleaning and disinfection is not necessary. Continue routinely cleaning and disinfecting all high-touch surfaces in the facility.

Follow the CDPH and CDC cleaning and disinfection recommendations:

- Clean dirty surfaces with soap and water before disinfecting them.
- To disinfect surfaces, use products that meet EPA criteria for use against SARS-CoV-2, the virus that causes COVID-19, and are appropriate for the surface.
- Always wear gloves and other PPE appropriate for the chemicals being used when you are cleaning and disinfecting.
- You may need to wear additional PPE depending on the setting and disinfectant product you are using. For each product you use, consult and follow the manufacturer’s instructions for use.

Determine which employees may have been exposed to the virus and may need to take additional precautions:

Inform employees of their possible exposure to COVID-19 in the workplace but maintain confidentiality as required by the Americans with Disabilities Act (ADA).

Follow the Public Health Recommendations for Community-Related Exposure and instruct potentially exposed employees to stay home for 14 days, or such period as established by local health order, telework if possible, and self-monitor for symptoms.

Measures to Maintain Healthy Ongoing School Operations

1. **Identify a workplace coordinator.** The School Compliance Task Force Team will be responsible for COVID-19 issues and their impact at the workplace.

2. **Protect employees at higher risk for severe illness through supportive policies and practices.** Older adults and people of any age who have serious underlying medical conditions are at higher risk for severe illness from COVID-19.

   - Provide options to telework, if available and reasonable.
   - Offer vulnerable workers duties that minimize their contact with students and other employees, if the worker agrees to this.
   - Offer flexible options such as telework to employees where available and reasonable to eliminate the need for employees living in higher transmission areas to travel to workplaces in lower transmission areas and vice versa.

3. **Communicate supportive workplace policies clearly, frequently, and via multiple methods.** Employers may need to communicate with non-English speakers in their preferred languages.

   - Train workers on how implementing any new policies to reduce the spread of COVID-19
may affect existing health and safety practices.

- Communicate to any contractors or on-site visitors about changes that have been made to help control the spread of COVID-19. Ensure that they have the information and capability to comply with those policies.
- Create and test communication systems that employees can use to self-report if they are sick and that you can use to notify employees of exposures and closures.
- Use a hotline or another method for employees to voice concerns anonymously. They may call the Home Office hotline line 213-293-7068. Consistent with the Employee Handbook and all applicable policies, the Charter School will not tolerate discrimination, harassment, or retaliation against any employee who reports COVID-19 symptoms or hazards.

4. **Establish policies and practices for social distancing.** Where possible and reasonable, alter your workspace to help workers and students maintain social distancing and physically separate employees from each other and from students, such as:

- Implement flexible worksites (e.g., telework).
- Implement flexible work hours (e.g., rotate or stagger shifts to limit the number of employees in the workplace at the same time).
- Increase physical space between employees at the worksite by modifying the workspace.
- Increase physical space between employees and students (e.g., physical barriers such as partitions).
- Use signs, tape marks, or other visual cues such as decals or colored tape on the floor, placed 6 feet apart, to indicate where to stand when physical barriers are not possible.
- Implement flexible meeting and travel options (e.g., postpone non-essential meetings or events in accordance with state and local regulations and guidance).
- Close or limit access to common areas where employees are likely to congregate and interact.
- Prohibit handshaking.
- Deliver services remotely (e.g., phone, video, or web).
- Adjust school practices to reduce close contact with and among students — for example, by using larger formal spaces (e.g., auditoriums) or outdoor areas for instruction.
- **When it is not possible to maintain a distance of at least six (6) feet, individuals shall be as far apart as possible.**
- In this situation, the Charter School will evaluate the need for additional eye protection and respiratory protection, consistent with CCR Title 8, section 5144.

5. **Facial Coverings**

- Until lifted, the CDPH has ordered that all persons must wear a cloth face covering at work if the hazard assessment has determined that they do not require PPE (such as a respirator or medical facemask) for protection.
  - A cloth face covering contains the wearer’s respiratory droplets to help protect their co-workers and others.
  - Cloth face coverings are not considered PPE. They help prevent those who do not know they have the virus from spreading it to others, but do not offer the same level of protection for wearers from exposure to the virus that causes COVID-19 as PPE.
- Remind employees that CDC recommends wearing cloth face coverings in public settings.
where other social distancing measures are difficult to maintain, especially in areas of
significant community-based transmission. Wearing a cloth face covering, however, does not
replace the need to practice social distancing.
• As necessary, the Charter School will provide clean and undamaged face coverings.
• All face coverings must be worn, cleaned, and replaced as needed, and unless an applicable
exception to wearing a facial covering applies, consistent with the Charter School’s COVID-
19 Health and Safety Policy.
• If an employee cannot wear a face covering, face shield with a drape, respiratory protection,
or another effective alternative to a facial covering, the employee shall be kept at least six (6)
feet apart from all other employees, students, and persons, unless the unmasked employee is
tested at least twice per week for COVID-19. However, testing an employee twice per week
is not an alternative to wearing a facial covering where otherwise required.

6. Engineering Controls

• To the maximum extent feasible, the Charter School will implement all appropriate actions
to protect employees where six (6) feet of physical distancing cannot be maintained,
consistent with the COVID-19 Health and Safety Policy, as well as this Plan.
• To the maximum extent feasible, the Charter School will ensure maximize the quantity of
outside air in buildings or by natural ventilation systems, except when the United States EPA
Air Quality Index is greater than one hundred (100) for any pollutant, or if opening windows
or doors would cause additional hazards to employees.
• Conducting bimonthly inspections of the HVAC system.
• To the extent feasible, the Charter School will increase the filtration efficiency of its existing
ventilations systems to the highest level that is safely allowable.

7. Give employees and students what they need to clean their hands and cover their coughs
and sneezes:

• Provide tissues and no-touch trash cans.
• Provide soap and water in the workplace. If soap and water are not readily available, use
alcohol-based hand sanitizer that is at least 60% alcohol. Ensure that adequate supplies are
maintained. All employees are encouraged to wash their hands frequently and will be
provided ample time to do so. Employees should wash their hands for at least twenty (20)
seconds each time.
• To the extent feasible, dependent on a hazard assessment, and consistent with the Charter
School’s COVID-19 Health and Safety Plan, the Charter School will consider providing
additional handwashing facilities.
• Provide soap and water in the workplace. If soap and water are not readily available, use
alcohol-based hand sanitizer that is at least 60% alcohol. Ensure that adequate supplies are
maintained.
• Ideally, place touchless hand sanitizer stations in multiple locations to encourage hand
hygiene.
• Place posters that encourage hand hygiene to help stop the spread at the entrance to your
workplace and in other workplace areas where they are likely to be seen. This should
include signs for non-English speakers, as needed.
• Direct employees to visit CDC’s coughing and sneezing etiquette and clean hands webpage

Updated on 01/28/2021
8. Limit Sharing of Tools, Equipment, and PPE

- The Charter School will not allow any employees, students, or any other persons to share any form of PPE, including but not limited to: Gloves, facial coverings, masks, and goggles.
- To the maximum extent feasible, the Charter School will prohibit the sharing of tools and equipment, including: Phones, headsets, desks, keyboards, and writing materials. Where sharing is required, the School will follow all cleaning and disinfection procedures, consistent with this Plan.
- On any Charter Schools busses or other vehicles which are otherwise shared, the high touch points such as steering wheels, seatbelt buckles, armrests, and seats will be disinfected between uses, consistent with this Plan.

9. Perform routine cleaning:

- Incorporate the Guidance for Cleaning and Disinfecting to develop, implement, and maintain a plan to perform regular cleanings to reduce the risk of exposure to COVID-19.
- Routinely clean and disinfect all frequently touched surfaces in the workplace, such as workstations, keyboards, telephones, handrails, and doorknobs.
  - If surfaces are dirty, clean them using a detergent or soap and water before you disinfect them in accordance with Healthy Schools Act protocols.
  - For disinfection, most common, EPA-registered, household disinfectants should be effective. A list of products that are EPA-approved for use against the virus that causes COVID-19 is available on the EPA website. Follow the manufacturer’s instructions for all cleaning and disinfection products (e.g., concentration, application method, and contact time).
- Discourage workers from using each other’s phones, desks, offices, or other work tools and equipment, when possible.
- Provide disposable disinfecting wipes so that employees can wipe down commonly used surfaces (e.g., doorknobs, keyboards, remote controls, desks, other work tools and equipment) before each use.
- Store and use disinfectants in a responsible and appropriate manner according to the label.
- Do not mix bleach or other cleaning and disinfection products together. This can cause fumes that could be very dangerous to breathe in.
- Advise employees to always wear gloves appropriate for the chemicals being used when they are cleaning and disinfecting and that they may need additional PPE based on the setting and product.

10. Perform enhanced cleaning and disinfection after persons suspected/confirmed to have COVID-19 have been in the facility:

- In the event of a suspected or confirmed COVID-19 case at the Charter School, the Charter School will determine all areas, materials, and equipment used by the case during the high-risk exposure period.
- Once identified, the Charter School will follow all CDC cleaning and disinfection recommendations of all pertinent areas.
• The Charter School custodian and a third-party custodial services vendor will work in conjunction to complete post-exposure cleaning and disinfection in accordance with CDC protocol and public health guidance.
• If a sick employee is suspected or confirmed to have COVID-19, follow the CDC cleaning and disinfection recommendations.

11. Minimize risk to employees when planning meetings and gatherings:

• Use videoconferencing or teleconferencing when possible for work-related meetings and gatherings.
• Cancel, adjust, or postpone large work-related meetings or gatherings that can only occur in-person in accordance with state and local regulations and guidance.
• When videoconferencing or teleconferencing is not possible, hold meetings in open, well-ventilated spaces continuing to maintain a distance of 6 feet apart and wear cloth face coverings.

12. COVID-19 Testing:

• Consistent with Cal/OSHA regulations, in the event of one (1) COVID-19 case, an outbreak, or a major outbreak at the Charter School campus, the Charter School will offer COVID-19 testing to employees with exposure at no charge, and during working hours.
• In the event of one (1) COVID-19 case in the workplace, COVID-19 testing will be offered to all employees who have had potential COVID-19 exposure.
• In the event of a COVID-19 outbreak pursuant to Cal/OSHA regulations:
  o The Charter School must provide testing to all employees who were present in the exposed workplace.
  o Pursuant to Cal/OSHA regulations, “employees in the exposed workplace shall be tested and then tested again one week later.”
  o After the first two (2) COVID-19 tests, the Charter School must provide continuous COVID-19 testing of employees remaining at the workplace at least once per week, until outbreak criteria are no longer met.
• In the event of a “major COVID-19 outbreak,” the Charter School will provide COVID-19 testing at least twice per week to all employees present at the exposed workplace during the thirty (30) day period, and who remain at the workplace. This testing regimen will continue until there are no new COVID-19 cases in the workplace for a fourteen (14) day period.
• Consistent with current Cal/OSHA regulations, the School will require certain frequencies of COVID-19 testing before allowing employees with COVID-19 exposure to return to campus.
• In the event that COVID-19 testing is mandated by Cal/OSHA regulations, all Charter School employees should be able to secure testing through their local county, free of charge and during working hours. The Charter School is currently working on arranging additional COVID-19 testing for all employees with a contracted testing vendor. As soon as more information is available, the Charter School will notify all employees as to further details.

12 An outbreak is defined by Cal/OSHA as one that is declared by the local public health department, or where there are three or more cases on campus within a 14-day period. 8 CCR §3205.1(a)(1).
13 8 CCR §3205.1(b)(2).A.
14 Cal/OSHA defines a major outbreak as “20 or more COVID-19 cases in an exposed workplace within a 30-day period.”
• If COVID-19 is not mandated by Cal/OSHA regulations, but testing is otherwise needed, employees may procure testing, likely free of charge, through their local county or from their health provider.

• Any employees who have questions regarding COVID-19 testing may contact the MPS Human Resources Department at hr@magnoliapublicschools.org.

Record Keeping and Availability of Plan

• The Charter School will maintain records of the steps taking to implement this Plan for at least one (1) year, consistent with 8 CCR §3202(b).

• This Plan shall be made available at the workplace to all Charter School employees, authorized representatives, and Cal/OSHA representatives immediately upon request.

• The Charter School will track all COVID-19 cases, by keeping a record of the employee’s name, contact information, occupation, location where the employee worked, the date of the last day at the workplace, and the date of a positive COVID-19 test. Medical information shall be kept confidential. The information shall be made available to employees, authorized employee representatives, or as otherwise required by law, with personal identifying information removed.

The CEO/Superintendent is authorized to implement changes or additions to this addendum in order to ensure compliance with new or revised orders or guidance from local, county, state or federal authorities (“Agencies”) and/or the facts of a specific circumstance, and to take any and all actions consistent with orders and guidance from the Agencies that is not specifically addressed by this policy. The CEO/Superintendent shall provide the Board with regular updates as to actions taken pursuant to this section.

## Appendix A

**Controls Table**

The following table presents examples of controls to implement in the workplace. The most effective controls are those that rely on engineering solutions, followed by administrative controls, then PPE. PPE is the least effective control method and the most difficult to implement. Worksites may have to implement multiple complementary controls from these columns to effectively control the hazard.

<table>
<thead>
<tr>
<th>Engineering (Facilities and Equipment)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Assess job hazards for feasibility of engineering controls</td>
<td></td>
</tr>
<tr>
<td>• Ensure ventilation and water systems operate properly</td>
<td></td>
</tr>
<tr>
<td>• Alter office workspaces to maintain social distancing. Examples include:</td>
<td></td>
</tr>
<tr>
<td>o Configure partitions as a barrier shield</td>
<td></td>
</tr>
<tr>
<td>o Move electronic payment reader away from cashier in cafeteria</td>
<td></td>
</tr>
<tr>
<td>o Use verbal announcements, signage, and visual cues to promote social distancing</td>
<td></td>
</tr>
<tr>
<td>o Remove/rearrange furniture</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Administrative</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Management and Communications</strong></td>
<td></td>
</tr>
<tr>
<td>• Monitor state and local public health communications about COVID-19</td>
<td></td>
</tr>
<tr>
<td>• Require students who are ill to stay home</td>
<td></td>
</tr>
<tr>
<td>• Encourage sick workers to report symptoms, stay home, and follow CDC guidance</td>
<td></td>
</tr>
<tr>
<td>• Develop strategies to:</td>
<td></td>
</tr>
<tr>
<td>o communicate with staff</td>
<td></td>
</tr>
<tr>
<td>o manage staff concerns</td>
<td></td>
</tr>
<tr>
<td>• Remind staff of available support services</td>
<td></td>
</tr>
<tr>
<td>• Communicate to partners, suppliers, other contractors on policies and practices</td>
<td></td>
</tr>
<tr>
<td>• Encourage social distancing and the use of cloth face coverings (if appropriate) in the workplace</td>
<td></td>
</tr>
<tr>
<td>• Use technology to promote social distancing (e.g., telework and virtual meetings)</td>
<td></td>
</tr>
<tr>
<td>• Cancel group events</td>
<td></td>
</tr>
<tr>
<td>• Close/limit use of shared spaces</td>
<td></td>
</tr>
<tr>
<td>• Consider policies that encourage flexible sick leave and alternative work schedules.</td>
<td></td>
</tr>
<tr>
<td>• Schedule stocking during off-peak hours</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Cleaning and Disinfection</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Clean and disinfect frequently touched surfaces, (e.g., counters, shelving, displays)</td>
<td></td>
</tr>
<tr>
<td>• Provide employees with disposable disinfectant wipes, cleaner, or sprays that are effective against the virus that causes COVID-19</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Training</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Provide employees with training on:</td>
<td></td>
</tr>
<tr>
<td>• Symptoms, emergency warning signs and high-factors for COVID-19</td>
<td></td>
</tr>
<tr>
<td>• Policies to reduce the spread of COVID-19</td>
<td></td>
</tr>
</tbody>
</table>
• Information regarding COVID-19 transmission, including that COVID-19 “is an infectious disease that can be spread through the air when an infectious person talks, vocalizes, sneezes, coughs, or exhales; as well as that COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth; as well as that infectious people may have no symptoms.”
• COVID-19 related benefits under federal, state, and local law, including any potential benefits under current workers’ compensation laws, the Families First Coronavirus Response Act (“FFCRA”), the Charter School’s leave policies, and any other rights by contract or collective bargaining agreement.
• Information regarding the fact that particles containing the virus can travel more than six (6) feet, especially indoors; and thus, why social distancing, proper hygiene, and PPE are so important.
  • General hygiene
  • Cleaning and disinfection
  • Cloth face covers
  • Social distancing
  • Use of PPE
  • Safe work practices
  • Stress management

---

**Personal Protective Equipment (PPE)**

• Conduct workplace hazard assessment
• Determine what PPE is needed for their workers’ specific job duties based on hazards and other controls present
• Select and provide appropriate PPE to the workers at no cost, and train employees in the use of the PPE.
